**9. OUTCOME 3: CARING: The VSU teacher education program provided me with the following knowledge, skills and dispositions:**

**10. Please provide any feedback that could help us improve the teacher education program.**

**Text Response**

Virginia State provided me with a solid foundation that has helped me in my first year of teaching. Continue the help you give to students to pass praxis it was a big help to me. The program prepared me well. I wish we had more time in student teaching. As I was learning the classroom and teaching we had to move to a new classroom. Thanks to all at VSU for helping me become a teacher. I love being the classroom and working with 5th graders. I am working in my content area outside of the public school system. Virginia State prepared me will. More time learning how to deal with students. Please provide as much time as possible to candidates to be in the classroom with teachers. I feel that I was well prepared because I took advantage of every opportunity to learn about teaching. I believe I was well prepared for the classroom. My job requires me to constantly motivate my students and help them with issue outside of the classroom. The more students get in the classroom the easier it will be for them to transition to the classroom. I am learning the KIPP system and will be teach in my own classroom soon. I would like to share the KIPP method with students at VSU. The training I received at VSU has helped me excel in my first year of teaching. I look forward to coming back to share my experience. Mrs. Miles was very helpful during student teaching. I believe future students should spend more time being supervised by her. Please continue to provide the individual help to students. It made a difference in helping me obtain my goal. The education I received from the education department was outstanding. I love what I do, Thanks to Virginia State for giving me the chance to be successful. Provide more support for the secondary education people. Thanks to Mrs. Miles for helping me in student teaching. I am always using the things you taught us. Please provide as much time in the classroom for students it really helped me become a good first year teacher. Keep preparing good teachers I was nominated for new teacher of the year at Lakeside. Thanks to all at Virginia State for preparing me to be a competent, caring and effective teacher. Mrs. Miles was a great teacher during student teaching. She is very good at what she does. Dr. Person and the HPER Department helped me obtain my goal. They worked with me to help me complete the program.
